

Assignment – 8

As part of this assignment I have used lab 6 assignment model itself. Below are the pictures taken from the system

I have given Chicago as starting point and newyork as ending point

NAME OF THE FIRST CITY ENTERED: CHICAGO

Humidity is: 77

Pressure is: 998

NAME OF THE SECOND CITY ENTERED: NEWYORK

Humidity is: 71

Pressure is: 1009

Distance between chicago and newyork is 710.9985966 miles

I have executed the same in my android mobile and below are the screen shots

Welcome To the Page

Please Enter the city Names For Weather Details And
Distance

Starting Point

Ending Point

get Weather

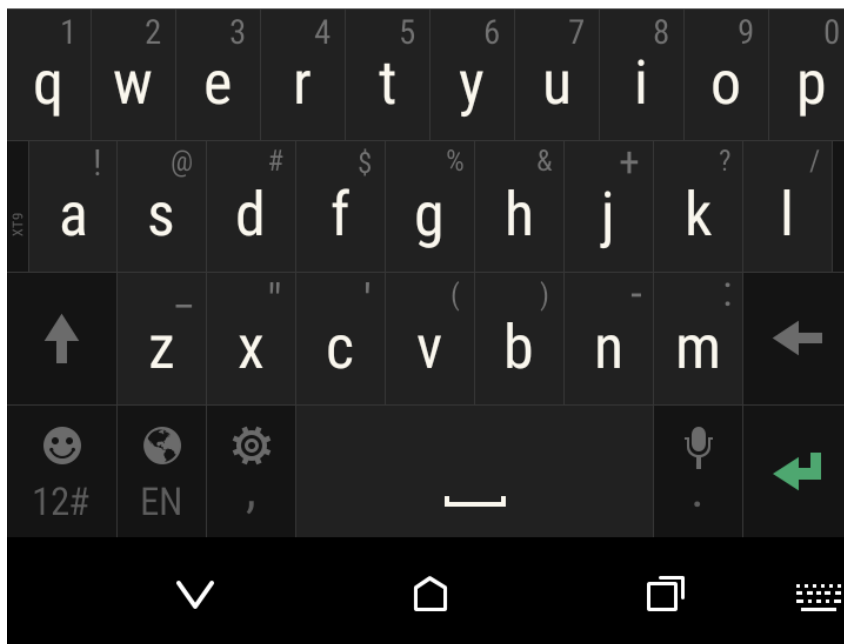

Welcome To the Page

Please Enter the city Names For Weather Details And
Distance

Chicago

Newyork|

get Weather

On clicking get weather button, below one will get displayed

NAME OF THE FIRST CITY ENTERED: CHICAGO

Humidity is: 87

Pressure is: 996

NAME OF THE SECOND CITY ENTERED: NEWYORK

Humidity is: 76

Pressure is: 1010

Distance between chicago and newyork is 710.9985966
miles

I have written three test cases in two different js files.
